Notes:
1. Organic excludes contributions by TDR, Blue Nile, Ten Motives and CHIC.
2. The term ‘Constant rates’ provides the information based on a re-translation, at prior year exchange rates, of the current year information.
3. Adjusted profit from operations is derived after excluding the adjusting items from the profit from operations. These items include restructuring and integration costs, amortisation and impairment of trademarks and similar intangibles, and a payment and release of a provision relating to non-tobacco litigation.
4. Estimate to exclude transactional foreign exchange on cost of sales.
5. 2015 cash generated from operations included a one-off receipt in relation to Franked Investment Income Group Litigation Order (FII GLO), which is not treated as part of on-going cash generation. For the avoidance of doubt – all variances in this document are calculated based upon the absolute number.
A great year

The Group delivered a great set of results in 2016, with excellent growth seen across all key business metrics. This was achieved despite a challenging backdrop of adverse foreign exchange rates impacting our cost base and ongoing pressure on consumers’ disposable income in many of our Key Markets.

The work that has been carried out in previous years to integrate and streamline internal systems, identify consumer needs earlier and increase efficiencies across the Group means that we now have the building blocks in place to continue to deliver for shareholders in the future.

Results

Group revenue was up by 6.9% at constant rates of exchange, driven by good pricing – with price mix exceeding 6%. Reported revenue was 12.6% higher, reflecting the translational tailwind resulting from the relative weakness of sterling. On an organic basis, Group revenue was up by 5.3% at constant rates.

At constant rates of exchange, adjusted profit from operations grew by 4.1% and adjusted diluted earnings per share grew by 10.4%.

Adjusted profits from operations would have grown by approximately 10% were it not for the significant ongoing effect of adverse foreign exchange movements on our cost base during 2016.

Underlying operating margin, excluding transactional foreign exchange and acquisitions, grew by around 160 bps. On a reported basis, it was down by 90 bps to 37.2%.

Agreement to acquire Reynolds American

I am very pleased that we reached an agreement with the Board of Reynolds American in relation to the acquisition of the remaining 57.8% of Reynolds American that the Group does not currently own.

This is a significant step towards the completion of this transaction and we look forward to putting the recommended offer to shareholders.

Strategically, this deal will create a truly global business with a world-class portfolio of tobacco and Next Generation Products that will be available across the most attractive markets in the world. Financially, it will be earnings accretive with enhanced cash generation while maintaining a solid investment grade credit rating.

We expect the transaction to close during the third quarter of 2017, subject to obtaining the relevant shareholder and regulatory approvals.

Combustible tobacco products

Total Group cigarette volume for the full year was up 0.2% to 665 billion. A 0.8% decline on an organic basis was considerably better than the industry, which we estimate to be down around 3.0%.

Strong growth in 2016, with overall market share in our Key Markets increasing by 50 bps, was driven by the continuing momentum of our Global Drive Brands (GDBs).

Total volume growth across the GDBs was an outstanding 7.5% and total market share growth was 100 bps. The GDBs now account for 49% of Group cigarette volume, up from 32% in 2011, demonstrating the key role they play in our growth strategy.

Next Generation Products

In 2016, we made significant progress with our differentiated strategy of developing and marketing a range of outstanding next generation tobacco and nicotine products, across both the Vapour and Tobacco Heating categories – having further strengthened our R&D capabilities and continued to invest in world-class science to provide our consumers with innovative and inspiring products.

Our Vapour Products business continues to perform very well and, following the geographic expansion of Vype in 2016, we are now present in ten markets and have the largest vapour business in the world outside of the US.

In the UK, our category retail share, as independently measured by AC Nielsen, has reached nearly 40% through the growth of Vype and the acquisition of Ten Motives. We also have an estimated market share of around 50% in Poland as well as category retail share of over 7% in Germany, over 4% in France and over 2% in Italy. In addition, we also launched a new vaping concept in Europe called the Vype Pebble, which we believe will enhance the overall category and increase consumer penetration.

In December 2016, we launched a new-to-world Tobacco Heating Product called glo in Sendai, Japan. Initial results are very encouraging, with glo gaining 5.4% volume share in a leading convenience store chain in Sendai after only ten weeks. Further roll-out and product upgrades are scheduled for 2017 and beyond.

These innovations, alongside our exciting pipeline, demonstrate our commitment to meeting all of the differing preferences of our consumers, providing them with a choice of outstanding products across the risk continuum.

Facing the future with confidence

As these results demonstrate, our combustible tobacco business continues to perform extremely well and I am very pleased with the progress we are making in Next Generation Products. Both would be made stronger by our proposed acquisition of Reynolds American, creating what will become a truly global tobacco and Next Generation Products company, delivering sustained long-term profit growth and returns.

The ongoing success of the Group is only possible by the passion and dedication of our talented people around the globe and I am confident that we are well placed to continue this success into the future.

Nicandro Durante
Chief Executive
Our heritage
British American Tobacco was founded in 1902 and was first listed in 1912. Today, we are one of the top five companies listed on the London Stock Exchange by market capitalisation. We also have a secondary listing on the Johannesburg Stock Exchange.

With factories in 42 countries and offices all around the world, we have long played a significant role in the local communities where we operate across the globe. We are proud that we are frequently rated in many countries as a top employer.

Traditional tobacco products are our core business. However, we are also committed to developing and selling potentially less risky alternatives to regular cigarettes. These Next Generation Products include Vapour Products, like e-cigarettes, and Tobacco Heating Products.

Our leading brands
Our five Global Drive Brands – Dunhill, Kent, Lucky Strike, Pall Mall and Rothmans – play a key role in our growth strategy. These leading brands continued to drive volume and share growth in our markets worldwide in 2016.

We have many other famous international and local brands including Vogue, Viceroy, Kool, Peter Stuyvesant, Craven A, Benson & Hedges, John Player Gold Leaf, State Express 555 and Shuang Xi.

Our key Next Generation Product brands include Vype, our range of Vapour Products, and glo, our Tobacco Heating Product.

Our products

Traditional tobacco products
Our core tobacco product range includes cigarettes, Fine Cut (roll-your-own and make-your-own tobacco) and Swedish-style snus. Using insights from our consumers, we continue to develop high-quality products and market-leading innovations to differentiate our brands.

Next Generation Products
We also market and sell a range of innovative Next Generation Products, the term we use to describe new types of tobacco and nicotine products. We are currently focusing on two distinct categories – Vapour Products and Tobacco Heating Products – which we believe have the potential to be both significantly less risky than conventional cigarettes and have widespread consumer appeal.
Our people

The Group’s continuing success is only possible thanks to the nearly 50,000 talented people across the globe who work with farmers, in our factories, in city offices and out on the road supporting retailers. This total involvement in the whole tobacco supply chain – from seed to smoke – and the passion for what we do is what sets us apart.

Our products are made all over the world and it is essential to our continuing success that we employ a diverse range of people and cultures. The international nature of our business is reflected in the nationalities of our people – in 2016, 74 nationalities were represented at our London head office.

We are also proud to partner with over 90,000 contracted tobacco farmers worldwide. While we do not employ them directly, they represent an important part of our business.

Our sustainable approach

Our approach to sustainability is embodied in our Sustainability Agenda, which is about creating shared value for both our shareholders and our stakeholders in wider society. It focuses on the three key areas that have the greatest significance to our business and our stakeholders:

– Harm reduction: We are committed to researching, developing and commercialising less risky alternatives to regular cigarettes.

– Sustainable agriculture and farmer livelihoods: We are committed to working to enable prosperous livelihoods for all farmers who supply our tobacco leaf.

– Corporate behaviour: We are committed to operating to the highest standards of corporate conduct and transparency.

Our geographic diversity

With brands sold in over 200 markets, we have strong market positions in each of our four regions. Our Key Markets, shown below, account for around 80% of both our total volume and Group profit.

Provided the acquisition of Reynolds American Inc. (Reynolds American) proceeds, we will have a strong market position in the United States and our number of principal associate companies will be reduced to one – ITC Ltd in India. We also have a joint operation, CTBAT, with China National Tobacco Corporation.

| 55+ countries where we are market leader |
| 44 cigarette factories in 42 countries |

Our strategy enables our business to deliver growth today, while continuing to invest in our future. Combustible products remain at the core of our business and will continue to provide us with opportunities for growth. However, we also see substantial growth opportunities in the Next Generation Products category and are making significant progress in the commercialisation and development of a range of products which offer consumers potentially less risky alternatives to conventional cigarettes.

### Our vision
World’s best at satisfying consumer moments in tobacco and beyond.

#### Satisfying consumer moments
We believe that by being the world’s best at satisfying consumer moments, we will become the leader in our industry. Consumers are at the core of everything we do and our success depends on addressing their evolving concerns, needs and behaviours.

#### Tobacco and beyond
The second part of our vision – tobacco and beyond – recognises the strength of our traditional tobacco business and the opportunities we see in Next Generation Products. This is a great potential business opportunity because consumers are looking for choices and product categories in which we are uniquely placed to succeed.

### Our mission
Delivering our commitments to society, while championing informed consumer choice.

#### Champion informed consumer choice
We need to continue to ensure that our adult consumers are fully aware of the choices they are making when they purchase our products. We recognise that we have a responsibility to offer a range of products across the risk continuum but we will also defend people’s right to make an informed choice.

#### Deliver our commitments to society
As society changes and priorities and needs shift, we must be ready to meet new challenges and take advantage of new opportunities. We are a major international business and with this status comes responsibilities such as developing and marketing less risky products, being open about the risks of all our products, supporting agricultural communities in leaf-growing areas worldwide and minimising our impact on the environment.

### Strategic focus areas
The foundations upon which our strategy is built have been in place for many years, but we continue to refocus our activities in all four areas and constantly review our ways of working.

- **Growth**
  Developing brands, innovations and new products to meet consumers’ evolving needs.

- **Productivity**
  Effectively deploying resources to increase profits and generate funds for investment.

- **Winning organisation**
  Ensuring we have great people, great teams and a great place to work.

- **Sustainability**
  Ensuring a sustainable business that meets stakeholders’ expectations.

### Guiding Principles
Our Guiding Principles provide clarity about what we stand for. They form the core of our culture and guide how we deliver our strategy.

- **Enterprising Spirit**
  We value enterprise from all of our employees across the world, giving us a great breadth of ideas and viewpoints to enhance the way we do business. We have the confidence to passionately pursue growth and new opportunities while accepting the considered entrepreneurial risk that comes with it. We are bold and strive to overcome challenges. This is the cornerstone of our success.

- **Open Minded**
  Our corporate culture is a great strength of the business and one of the reasons we have been, and will continue to be, successful. We are forward-looking and anticipate consumer needs, winning with innovative, high-quality products. We listen to, and genuinely consider, other perspectives and changing social expectations. We are open to new ways of doing things.

- **Freedom Through Responsibility**
  We give our people the freedom to operate in their local environment, providing them with the benefits of our scale but the ability to succeed locally. We always strive to do the right thing, exercising our responsibility to society and other stakeholders. We use our freedom to take decisions and act in the best interest of consumers.

- **Strength from Diversity**
  Our management population comprises people from over 140 nations, giving us unique insights into local markets and enhancing our ability to compete across the world. We respect and celebrate each other’s differences and enjoy working together. We harness diversity – of our people, cultures, viewpoints, brands, markets and ideas – to strengthen our business. We value what makes each of us unique.
Adjusted profit from operations grew strongly at constant rates of exchange.

As reported profit can be materially affected by exchange rate movements, the regional performance is presented at constant rates of exchange.

Our five Global Drive Brands (GDBs) had another successful year in 2016, growing volume and share in Key Markets.

Notes:
1. Constant currency (CC) provides the information based on a re-translation, at prior year exchange rates, of the current year information.
2. Profit refers to adjusted profit from operations and is derived after excluding the adjusting items from the profit from operations. The main items for 2016/2015 are restructuring and integration costs, amortisation and impairment of trademarks and similar intangibles.
What we do
At the heart of our business is the manufacturing and marketing of superior tobacco products and Next Generation Products. Our sustainable approach to sourcing, production, distribution and marketing helps us to create value for a wide group of stakeholders, from farmers to consumers. We use our unique strengths and employ our resources and relationships to deliver sustainable growth in earnings for our shareholders.

Our people and relationships
We employ around 50,000 people worldwide, with a workforce that is diverse and multicultural. We have a devolved structure, with each local company having responsibility for its operations. We encourage a culture of personal ownership and value our employees’ talents and abilities. Their diverse perspectives help us to succeed.

We also have excellent relationships with a range of stakeholders, including farmers, retailers and distributors. We engage with regulators around the world to support regulation that is based on robust evidence and thorough research, that respects legal rights and livelihoods, and delivers on the intended policy aims while recognising unintended consequences.

Source
What we do
While the Group does not own tobacco farms or directly employ farmers, we buy more than 400,000 tonnes of tobacco each year for our tobacco products and Tobacco Heating Products. The e-liquids used in our Vapour Products are made from medical grade nicotine sourced from high quality third-party manufacturers.

What makes us different
• We provide on-the-ground support and advice to over 90,000 contracted farmers to help ensure consistency and quality of supply.
• We work to enable prosperous livelihoods for all farmers who supply our tobacco leaf, investing over £60 million each year to support them through, among other initiatives, training and capacity building, and improving productivity.
• Our leaf operations are managed globally to ensure that the Group works with reliable, efficient and responsible farmers in our source countries.

Market
What we do
We offer adult consumers a range of products, including cigarettes, Fine Cut tobacco, Swedish-style snus and Next Generation Products in a number of markets. Our range of high-quality products covers all segments, from value-for-money to premium.

What makes us different
• Our successful portfolio of international, regional and local tobacco brands meets a broad array of adult consumer preferences wherever we operate, based on sound consumer insights.
• Our international brand strategy focuses on our Global Drive Brands, which account for 49% of the cigarettes we sell and are a significant driver of growth.
• Our commitment to substantial investment in a range of Next Generation Products, including Vapour Products (like e-cigarettes) and Tobacco Heating Products, enables us to meet varied consumer needs in this emerging product category.
Innovation

We make significant investments in research and development to deliver innovations that satisfy or anticipate consumer needs and generate growth for the business. This involves cigarette innovations such as capsule products, additive-free products, slimmer products, tube filters and Reloc, our resealable pack technology.

We also look outside the traditional cigarette market and research, develop and test Next Generation Products such as Vapour Products (e-cigarettes) and Tobacco Heating Products.

World-class science

We have an extensive scientific research programme in a broad spectrum of scientific fields including molecular biology, toxicology and chemistry. We have spent more than US$1 billion on research and development over the past five years – with a focus on products that could reduce the risk associated with smoking conventional cigarettes.

We are transparent about our science and publish details of our research programmes on our dedicated website, www.bat-science.com, and the results of our studies in peer-reviewed journals.

Produce

What we do

We manufacture high-quality products in state-of-the-art manufacturing facilities all over the world. We also ensure that these products and the tobacco leaf we purchase are in the right place at the right time. Our Next Generation Products are mainly manufactured in state-of-the-art third-party factories. We work to ensure that our costs are globally competitive and that we use our resources as effectively as possible.

What makes us different

- In 2016 we had 44 cigarette factories across the globe. These strategically placed factories enable us to maximise efficiency and ensure products are where they need to be at the right time.
- Our production facilities are designed to meet the needs of an agile and flexible supply chain, providing a world-class operational base that is fit for the future.
- For our Next Generation Products, we expect our contract manufacturers to comply with the same high standards that exist on our own sites.

Distribute

What we do

We distribute our products around the globe effectively and efficiently. Around half of our global cigarette volume is sold by retailers, supplied through our direct distribution capability or exclusive distributors. We continuously review our route to market for combustible products and Next Generation Products, including our relationships with wholesalers, distributors and logistics providers.

What makes us different

- Our relationships with, and efficient distribution to, retailers worldwide ensures we can offer the products our adult consumers wish to buy, where and when they want them.
- Our global footprint and direct distribution capability enables new product innovations to be distributed to markets quickly and efficiently.

Consumers

We place adult consumers at the heart of our business. We invest in world-class research to understand changing consumer needs and buying behaviour. This drives our leaf sourcing, product development, innovations, brands and trade activities.

We aim to satisfy consumers with a range of inspiring products across the risk spectrum and address expectations about how we should market them.

Future Payment of Dividends – Mandatory Direct Credit
From 2018, British American Tobacco is simplifying the way in which it pays dividends to shareholders by only paying cash dividends directly into a shareholder's nominated bank account. This is known as mandatory direct credit. British American Tobacco will no longer be issuing dividend cheques. Shareholders recorded on the main register as receiving dividend payments by cheque have been or will be advised by Computershare. Those shareholders will need to take the required action by selecting the appropriate option as set out in the Computershare notification.

Shareholders on the UK main register who already have their dividends paid: (1) by direct credit into their UK bank or building society account; or (2) through the Euroclear service using the CREST messaging system; or (3) through Computershare’s Global Payments Service (GPS) are not affected by this change. Similarly, shareholders who participate in the British American Tobacco Dividend Reinvestment Plan (DRIP) are not required to take any action unless they choose to withdraw from the DRIP.

For the South Africa branch register, Computershare South Africa will notify affected shareholders of the equivalent applicable arrangements for the payment of dividends, as appropriate.

Performance Summary 2016: Cautionary statement and other information
This Performance Summary is extracted (without material adjustment) from, and should be read as an introduction to and in conjunction with, the British American Tobacco p.l.c. Annual Report 2016 which comprises its Strategic Report, Directors’ Report and Group Financial Statements.

The Performance Summary contains forward-looking statements that are subject to risk factors associated with, among other things, the economic and business circumstances occurring from time to time in the countries and markets in which the Group operates. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a wide range of variables that could cause actual results to differ materially from those currently anticipated.

The Performance Summary is provided for information only and is not intended to be a substitute for reading the Annual Report. In particular, the Performance Summary does not comprise the Company’s Strategic Report or any supplementary materials and it does not contain sufficient information to allow for a full understanding of the results of the Group and the state of affairs of the Group, and the principal risks and uncertainties facing the Group, as would be provided by the full Annual Report. Shareholders may view a copy of the Annual Report on www.bat.com or obtain a hard copy free of charge.

If you have sold or transferred all your shares in British American Tobacco p.l.c., you should send this document to the bank, stockbroker or other agent through whom the sale or transfer was effected for transmission to the purchaser or transferee.

References in this publication to 'British American Tobacco', 'BAT', 'we', 'us', and 'our' when denoting opinion refer to British American Tobacco p.l.c. (the Company) (No. 3407696) and when denoting tobacco business activity refer to British American Tobacco Group operating companies, collectively or individually as the case may be.
