Our Low-Carbon Strategy

- Invest in energy efficiency projects and management systems
- Increase renewable energy sourcing & Power Purchasing Agreements (PPAs)
- Site specific decarbonisation roadmaps
- Invest in on-site renewable energy generation projects
- Roll out electric and hybrid vehicles in our fleet
- Increase use of sustainable materials
- Design for end-of-life
- Sustainable Supply Network design, e.g. supply chain/business model
- Smart carbon farming (nature based solutions) & Curing Efficiency Projects
- For our value chains
- For our operations
- Our impact on climate
- Climate’s impact on us
- In our decision making

Our impact on climate
